This quality European range will complement any buffet/kitchen environment and is the perfect companion to other units in the **Emainox** Range

Drop-in Heated Ceramic Glass Hotplate is flush mounted into the stainless steel top for durability and ease of cleaning. Maximum operating temperature of 1200C is adjustable and controlled via a mechanical thermostat. Careful design and placement of the heating elements gives even heat across the ceramic glass hot plate, with faster warm up and better economy. Designed for 1/1 GN containers, this series of Ceramic Glass Hotplate is available in sizes of 800, 1125, 1455 and 1780.

SPECIFICATION:

MODEL	SIZE (L x D)	WELL SIZE (L x D)	NO. PANS	AMPS	WATTS
8046400	800 x 700mm	650 x 510mm (single glass)	2GN1/1	5	1200
