EASY

ELECTRIC KETTLE - NON MIXING

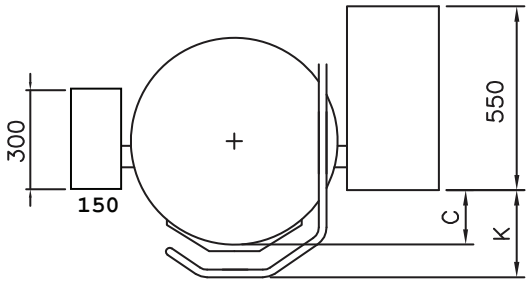

GENERAL CHARACTERISTICS
- Nominal content: 40, 60, 80, 100, 120 litre
- Kettle bowl in 316 acid resistant steel, all other parts in 304 stainless steel
- Full welded, insulated kettle body with etched volume markings
- Working pressure: 1,0 bar
- Max. steam temperature: 120° C
- Integrated isolator switch
- Pressure gauge
- Tilting height: min. 400mm from floor to bottom of pouring lip
- Unheated top for lower energy waste and better comfort
- Hinged lid easy to open/close and with ergonomic lid arm
- Lid made from stainless steel
- Max temp. on the outside of the kettle bowl after 3 hours cooking: <40°C
- Working height: 900 mm
- Electrically automatic filling of water in the steam generator
- Spray gun

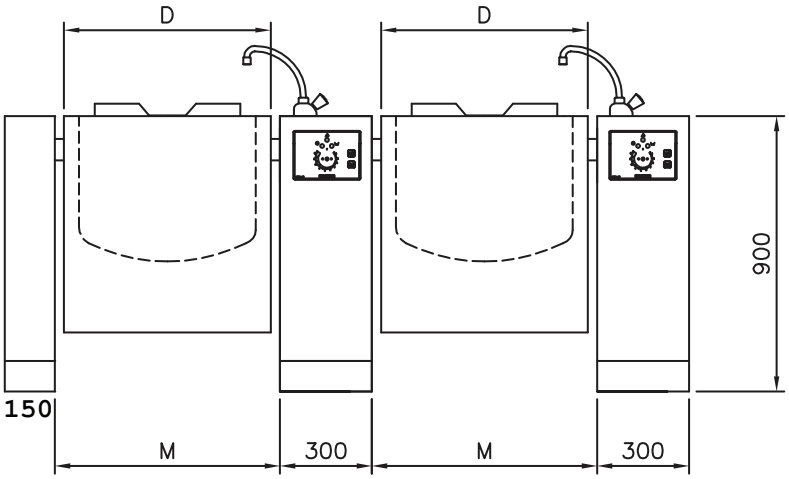

CONTROL AUTO TEMP 02E
- Electronic heat control by means of dial knob
- Filling of water into the kettle via cold water tap
- Indicator light for kettle in use
- Indicator light to indicate excessive pressure in the kettle/ overheating of the heating elements

OTHER OPTIONS
- Drain valves/Butterfly valves
- Rotatable lid

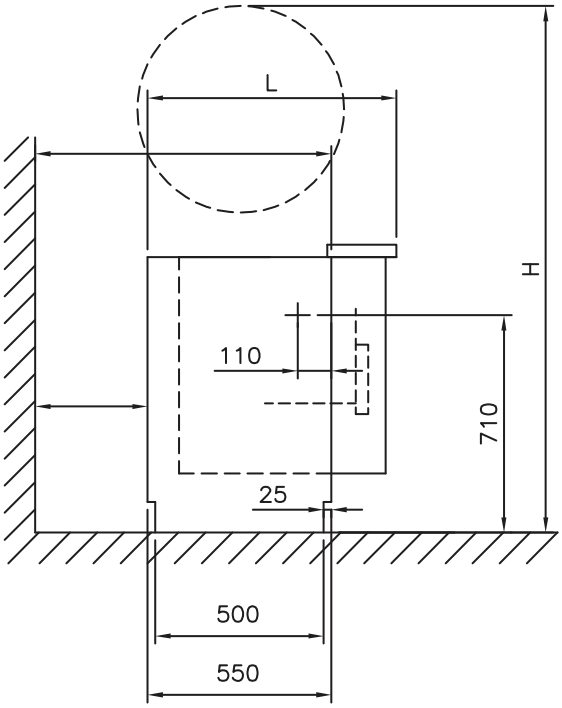

VARIANTS
- Can be built together with Easy and EasyMix
- Mounting pillar to the left

AutoTemp 02e
